

1 Plan your installation in the space

Prior to install, acquire the appropriate tools and plan out your lighting in your outdoor space

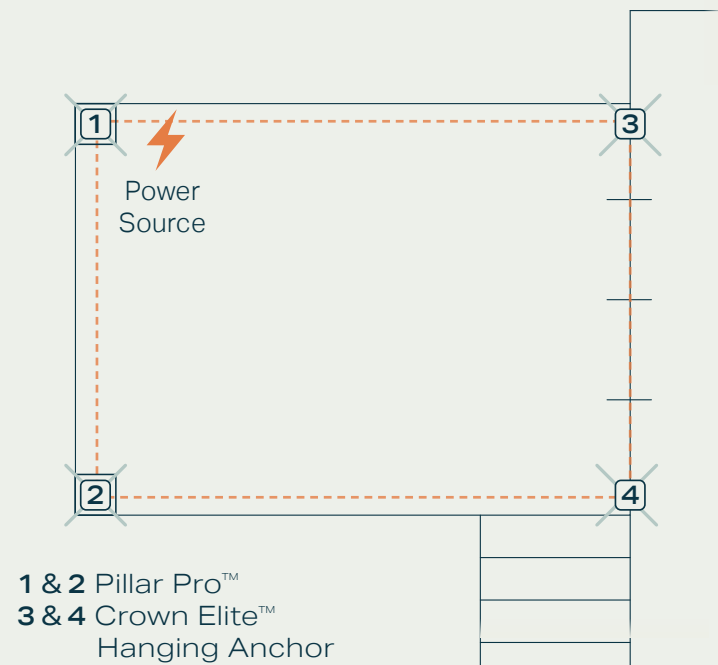

Need additional support?

Visit the QR code for an in-depth instructional video and FAQs

Tools you will need:

- Level
 - Tape Measure
 - Ladder
 - Cordless Drill
 - Drill bit
- Use the appropriate bit based off the surface, we recommend drilling appropriately sized pilot holes*

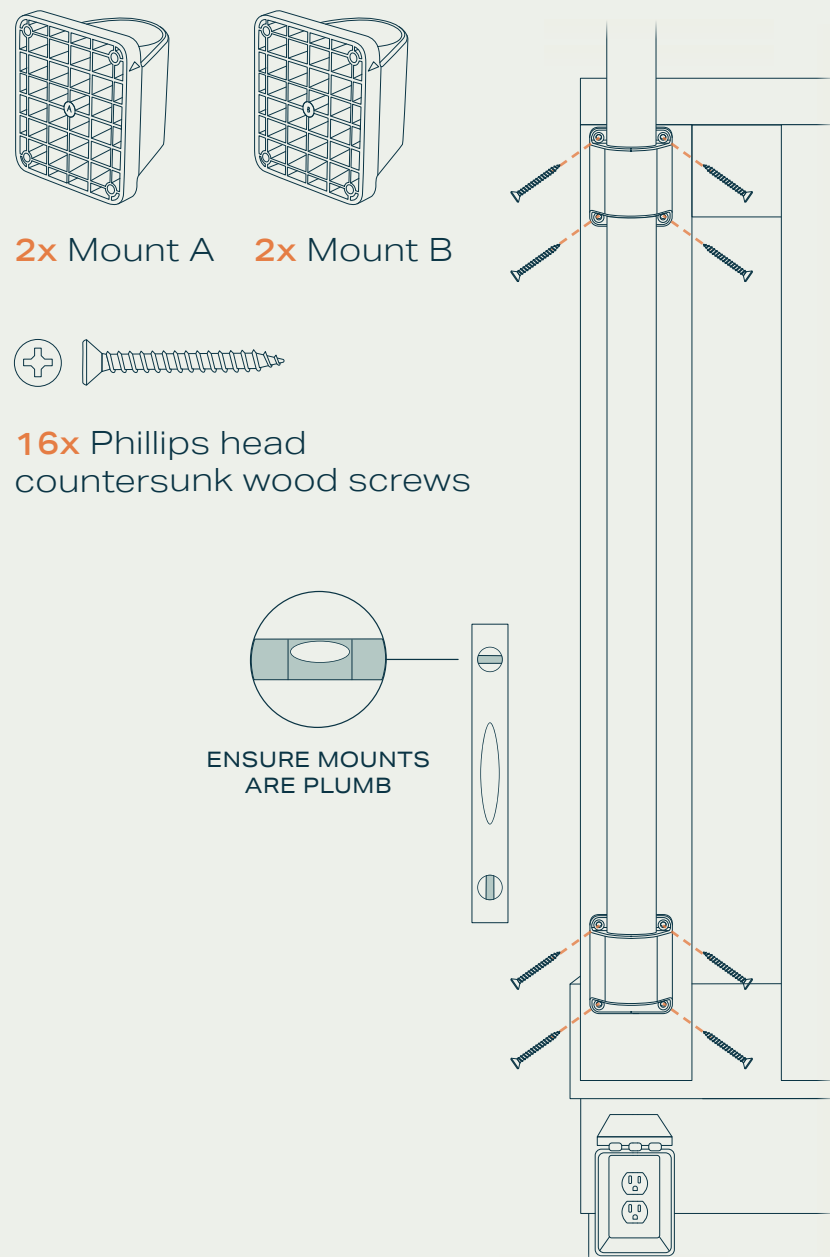

PLANNED LAYOUT EXAMPLE:

2 Install the Vertical Mounting Brackets

Place pillar in mounting bracket to ensure plumb during the bracket installation process; remove once completed

Ensure you are using the correct A/B bracket, indicated on the back. Arrows should be facing up on each bracket

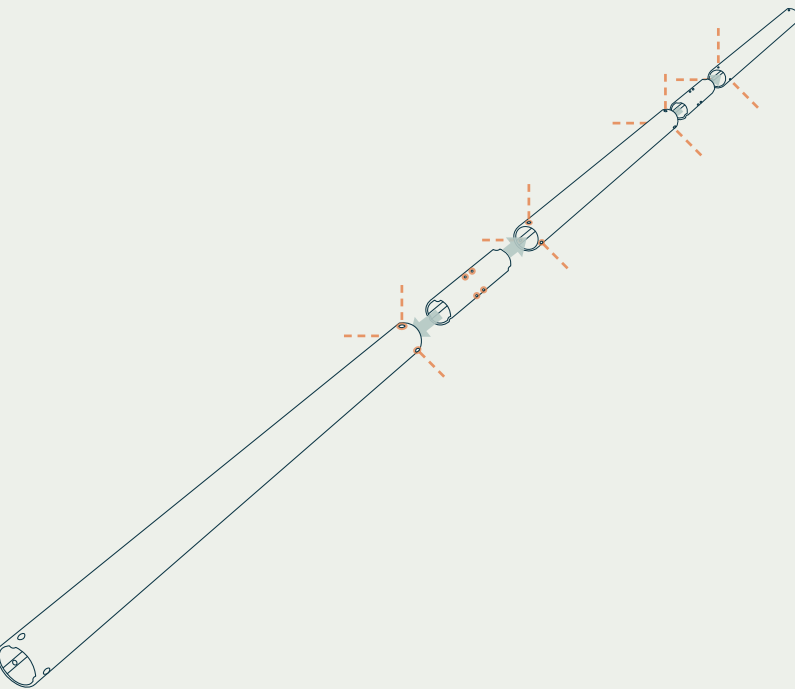

3 Assemble the Pillar Pro™ poles

Start all screws before tightening, do not over-tighten screws — tighten just snug enough to provide adequate support

If you plan to hide a cord inside the pillar, you must remove the Crown Anchor base, so screws may be left loose for now

- 2x Pillar Pro™
- Each Pillar Pro™ consists of:
- 3x Pillar segments
 - 2x Internal connectors
 - 1x Assembled Crown Anchor

- 24x Allen head countersunk screws

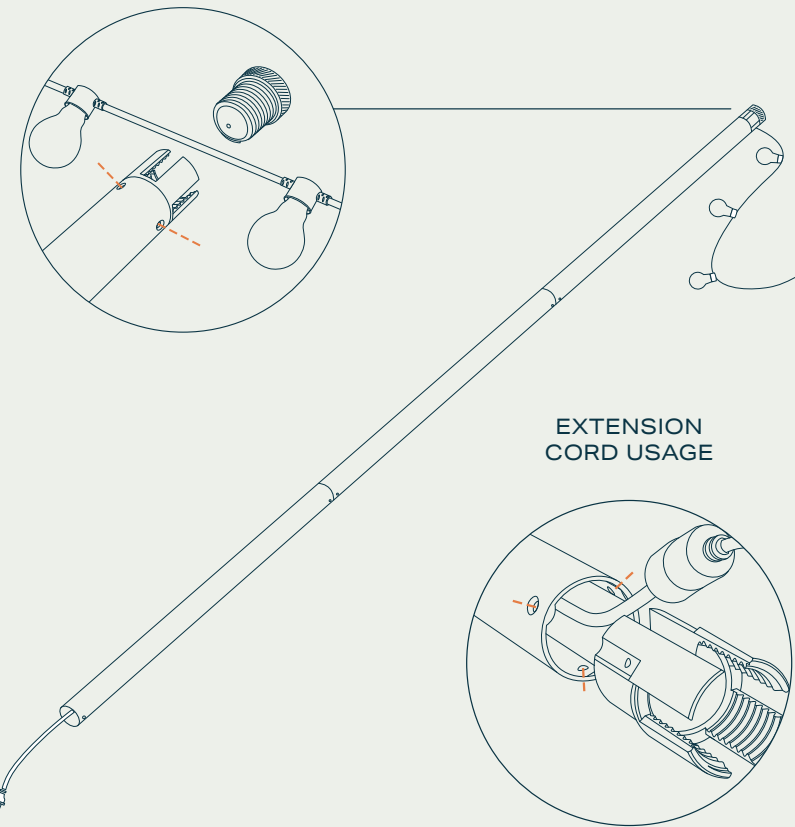

4 Install lights into the assembled Crown Anchor

Install string lights into the assembled Crown Anchor prior to inserting the pillars in their mounting brackets

When using extension cord, run the cord through the top of the pillar, pushing the male end of the cord through and leaving the female end at the top

- 2x Integrated Crown Elite Anchors

- 3x Phillips countersunk self-drilling screws

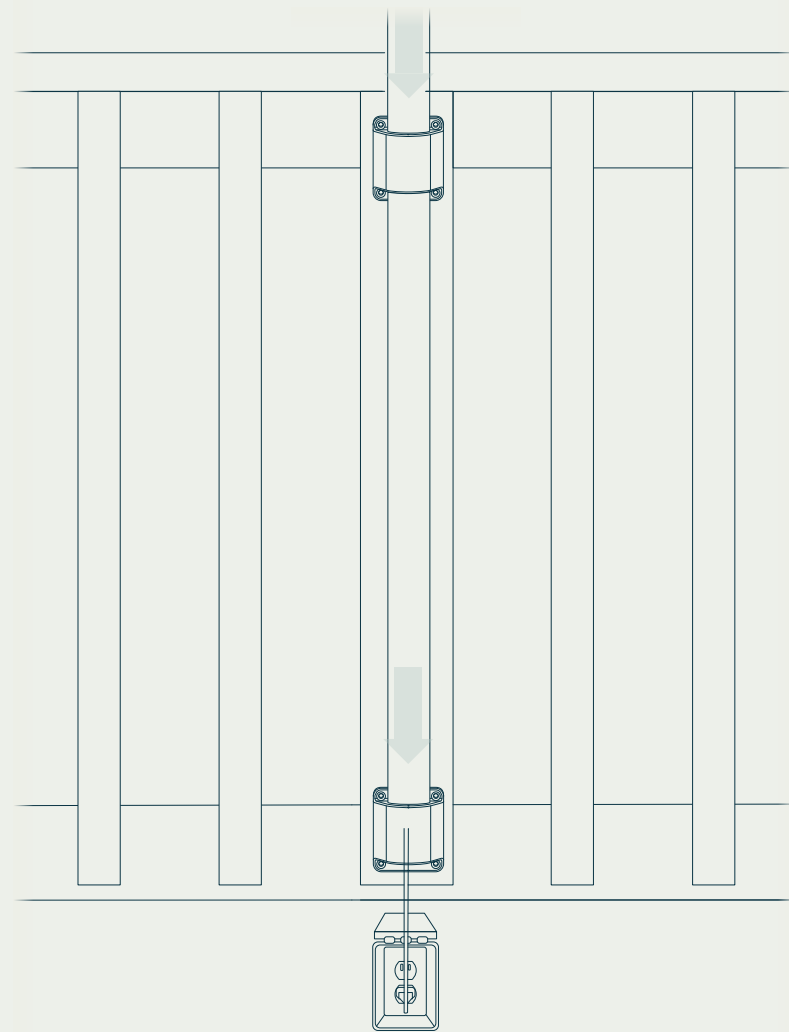

5 Install the Pillar Pro™ into the Mounting Brackets

Mounting screws should be tight to ensure the base is firmly attached to the wall or structure

For extension cord usage, run the extension cord through the assembled Crown Anchor and tighten the Crown Anchor bolt just enough to hold in place

You can adjust the tension of the string lights to your preference by pulling them taut and snugging the Crown Anchor bolt at the top of the pillar

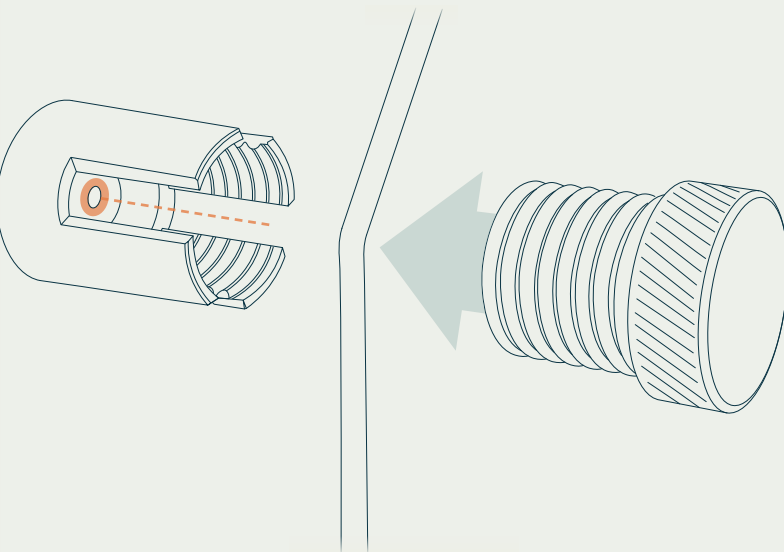

6 Install the Crown Elite Hanging Anchors

Attach the Crown Elite™ Hanging Anchors securely to adjacent walls or vertical surfaces

Secure string lights in the hanging anchor and adjust tension as needed

- 2x Phillips head screws with anchor (depending on surface)

- 2x Crown Elite Hanging Anchors
